This certificate indicates how much energy is being used to operate this building. The operational rating is based on meter readings of all the energy actually used in the building. It is compared to a benchmark that represents performance indicative of all buildings of this type. There is more advice on how to interpret this information on the Government’s website www.communities.gov.uk/ebpd.

Energy Performance Operational Rating
This tells you how efficiently energy has been used in the building. The numbers do not represent actual units of energy consumed; they represent comparative energy efficiency. 100 would be typical for this kind of building.

More energy efficient

A 0-25
B 26-50 44
C 51-75
D 76-100

100 would be typical

E 101-125
F 126-150
G Over 150

Less energy efficient

Total CO₂ Emissions
This tells you how much carbon dioxide the building emits. It shows tonnes per year of CO₂.

Previous Operational Ratings
This tells you how efficiently energy has been used in this building over the last three accounting periods
