Priority 2009: help us to save energy

Library catalogues now run from low energy PCs. These are estimated to save £7000 a year in electricity.

If left on 24/7:
average PC = £130 per year
mini PC = £8 per year

CLS currently contributes around £60,000 to the University’s energy bill.

ethical disposal

We now send our withdrawn books to Better World Books or Anybook Library Services after they have been offered to students on the book-sale.

These companies reseed the books.
Better World books support international literacy charities.
Anybook generate income for themselves and for us.
Any books that we don’t send are recycled.
