Poster Promenade

User friendly tool to recharge users for their private calls

Why the Tiger VMC Solution?

- Users can quickly report within a designated time window for any extensions or mobile devices they are responsible for
- The user can filter the call data using the column headers to find individual, or groups of, calls
- Offers dialled, received and missed call logs independent of telephone handset
- Optional integrated Active Directory Authentication (single sign on)
- Calls made to numbers within the user's address book are automatically suggested for charge back. Each user has the opportunity to amend and accept the automatic suggestions prior to the billing period being closed by the administrator
