Mobile Data Encryption and Management Project

Why:
- To ensure that University data is protected when stored on mobile devices
- To provide an efficient way of managing mobile devices to ensure security of data should a device be lost or stolen
- To ensure a scalable and resilient solution

What:
- To provide full disk encryption for all laptop computers storing University data
- To provide full disk encryption for all removable devices storing University data
- To provide complete management for all University owned mobile devices

When:
Coming Summer 2013
