

Do you want to print from your mobile device to ANY printer on campus?

Of course you do!

PrinterOn Education enables students and staff to print simply anywhere

- **Multiple users and device platforms?** PrinterOn Education supports all mobile device types for your BYOD environment. Students can print from any device on any platform.
- **Mixed printer fleet?** PrinterOn Education supports all printer manufacturers, enables mobile printing on your existing devices.
- **Multiple networks?** PrinterOn Education connects disparate networks across the campus and also allows students to print to one of the thousands of PrinterOn public printing locations using the same secure, familiar platform.

The cost of installing PrinterOn starts at £260 per printer.

PrinterOn Education is specifically designed for any educational institution that wants to provide simple, secure and authenticated mobile printing to students and staff. One of the challenges on a campus is the Bring Your Own Device (BYOD) printing trend and finding a way for users to print from their laptops, smartphones and tablets without having to join the secure network. IT departments are typically concerned about security and ease-of-use among other issues.

PrinterOn Education provides the security, flexibility, usability and reliability required by a campus with thousands of students, various device platforms and multiple networks. PrinterOn Education is a private cloud solution which is deployed directly on-site for schools that require integrations to existing authentication and print management systems, extending and enhancing existing infrastructure investments.

Our unique private cloud infrastructure ensures documents are printed and managed with your network regardless of device, printer, network or geographic location. Our rapid deployment model requires minimal changes to the network even in the most complex environments. Low cost of ownership and little on-going IT support make it the mobile printing platform of choice for universities and colleges worldwide.
