Why have we changed?

The new agreement offers us substantial savings compared with the old contract, especially in terms of monthly data costs which are around 50% cheaper than the old contract.

The migration to the new contract will involve:

- Purchasing all future new connections from O2
- Moving existing O2 accounts to the new tariff structure
- Migrating EE data-only connections
- Undertaking a phased migration (by School and service) of all EE voice-only and voice-and-data connections
